

**Excellent For  
Newly Planted Turf.**

# **SUPER SEAWEED™**

FOR STRESS RELIEF & SOIL CONDITIONING

**\*University documented\***

## **GENERAL INFORMATION:**

Throughout history Seaweed has been used in growing crops. It contains literally every natural nutrient known to Man.

Our SUPER SEAWEED™ is cold water North Atlantic Ocean variety and not fresh water lake type, thus providing for maximum nutrition. There are many types of Seaweed on the market. Not all are equal.

A Clemson University study has proven that the best source of Seaweed comes from the clean cold waters of the North Atlantic. The reason for this is because the ASCOPHYLLUM NODOSUM variety is found there. It only grows in cold water locking in the nutrients. ASCOPHYLLUM NODOSUM is recognized as an excellent Natural fertilizer and a source for organic matter.

Research on plant growth conducted over the last two decades has demonstrated that the plants assimilate essential micro-nutrients more readily when they are applied directly as a foliar feed than when applied through the soil in an Organic form.

**SUPER SEAWEED™** has a direct effect on the stress relief on root systems, because of it containing the growth regulators and growth promoters Cytokinin, Indole, Auxins and Gibberellin.

**Cytokinin** - are cell division factors, which rapidly divides cells

**Indole** - are naturally occurring, help the roots.

**Auxins** -for the roots & cells divisions.

**SUPER SEAWEED™** supplies a wide range of carbohydrates including mannitol and organic acids. Mannitol is a natural chelating agent, which can release unavailable trace elements already in the soil, for root uptake. *To an already superb product we add Humic acid.*

This unique balance created in the blending of **SUPER SEAWEED™** assists in:

- .. increasing root growth*
- .. Quick root start*
- .. increasing tolerances to stressful conditions*

**SUPER SEAWEED™** is a foliar applied product compatible when mixed with other solutions, although a compatibility test is always recommended prior to mixing large tank mixes.

**SUPER SEAWEED™** liquid formula is available in 2.5, 5, 55 gallon containers. 275 Gallon Totes .
